Level 2 — Medium

(M) Max-Min — Array

✓ Submitted

Find the Mth maximum number and Nth minimum number in an array and then find the sum of it and difference of it.

Sample Input:

Array of elements = {14, 16, 87, 36, 25, 89, 34}

M = 1

N = 3

Sample Output:

1stMaximum Number = 89

3rdMinimum Number = 25

Sum = 114

Difference = 64

Testcases:

1. {16, 16, 16 16, 16}, M = 0, N = 1
2. {0, 0, 0, 0}, M = 1, N = 2
3. {-12, -78, -35, -42, -85}, M = 3 , N = 3
4. {15, 19, 34, 56, 12}, M = 6 , N = 3
5. {85, 45, 65, 75, 95}, M = 5 , N = 7

Your Code

```
1 import java.util.*;
2 class Main{
3     public static void main(String args[])
4         Scanner sc=new Scanner (System.in)
5         int s=sc.nextInt();
6         int a[]= new int[s];
7         for(int i=0;i<s;i++){
```

```
8         a[i]=sc.nextInt();
9     }
10    int M=sc.nextInt();
11    int N=sc.nextInt();
12    Arrays.sort(a);
13    int Mth=a[a.length-M];
14    int Nth=a[N-1];
15    int sum=Mth + Nth;
16    int diff=Mth - Nth;
17    System.out.println("1stMaximum Number = "+ Mth);
18    System.out.println("3rdMinimum Number = "+ Nth);
19    System.out.println("Sum = "+ sum);
20    System.out.println("Difference = "+ diff);
21
22 }
23 }
```

Output

```
1stMaximum Number = 89
3rdMinimum Number = 25
Sum = 114
Difference = 64
```
