Q3 E-Commerce Product Search – Array Exception Debugging

10 marks

An online shopping application allows customers to select a product using a product number from 1 to 5.

The following program contains an array indexing error.

Task:

1. Identify the error.
2. Correct the product-number and array-index logic.
3. Handle invalid product numbers.
4. Handle non-numeric input.
5. Submit the COMPLETE corrected Java program.
6. The program must display "Search completed" after processing.

Faulty Program:

```
import java.util.Scanner;

class ProductSearch {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);
```

10 marks

5/5 answered

```
String[] products = {  
    "Laptop",  
    "Mobile",  
    "Tablet",  
    "Headphone",  
    "Keyboard"  
};  
  
System.out.print("Enter product number (1-5): ");  
int productNumber = sc.nextInt();  
  
System.out.println("Selected product: "  
+ products[productNumber]);  
  
System.out.println("Search completed");  
}  
}
```

Correct the program so that product numbers 1, 2, 3, 4 and 5 correctly access the corresponding products.

 **Debugging Task:** Find and fix the bugs in the code shown above. Write your corrected code in the editor below.

Your Fixed Code

```
1 import java.util.*;  
2 public class Main{  
3     public static void main(String args[]){  
4         Scanner sc=new Scanner(System.in);  
5         String[] p={"Laptop","Mobile","Tablet","Headphone","Keyboard"};  
6         try{
```

```
7         int pn=sc.nextInt();
8         if(pn<1|| pn>5){
9             System.out.println("Invalid product no:");
10        }
11        else
12            System.out.println("Selected product:"+ p[pn-1]);
13
14    }
15    catch(InputMismatchException e){
16        System.out.println("Ivalid input");
17    }
18    catch(Exception e){
19        System.out.println("Search failed");
20    }
21    finally{
22        System.out.println("Search completed");
23    }
24 }
25 }
```

Test Input

5

Output

```
Selected product:Keyboard  
Search completed
```

 Pending manual review
