Character

### CHARACTER

You are developing a game that involves different types of characters, such as heroes, villains, and monsters. Write a Java program to create an interface called "Character" with methods for moving, attacking, and taking damage. Implement the interface in classes for each type of character, such as "Hero", "Villain", and "Monster".

## PROGRAM EDITOR

Java

Run

Save

```
1 interface Character {
2     void move();
3     void attack();
4     void takeDamage(int damage);
5 }
6
7 class Hero implements Character {
8     private int health = 100;
9
10    public void move() {
11        System.out.println("Hero moves swiftly!");
12    }
13
14    public void attack() {
15        System.out.println("Hero attacks with courage!");
16    }
17
18    public void takeDamage(int damage) {
19        health -= damage;
20        if (health < 0) {
21
```

**OUTPUT**

```
---- Hero ----  
Hero moves swiftly!  
Hero attacks with courage!  
Hero takes 20 damage. Health: 80  
  
---- Villain ----  
Villain moves with stealth!  
Villain attacks with evil plans!  
Villain takes 35 damage. Health: 85
```
