Student-Const

STUDENT-CONST

Write a Java program to create a class called Student with a constructor that takes in a name, ID number, and a list of grades, and methods to calculate and return the student's average grade and letter grade.

PROGRAM EDITOR

Java

Run

Save

```
32     if (average >= 80) return 'B';
33     if (average >= 70) return 'C';
34     if (average >= 60) return 'D';
35     return 'F';
36 }
37
38 // Main method to test the class
39 public static void main(String[] args) {
40     List<Double> studentGrades = new ArrayList<>();
41     studentGrades.add(85.0);
42     studentGrades.add(90.5);
43     studentGrades.add(78.0);
44
45     Student student = new Student("Akileshwaran", "192511354RD", studentGrades);
46
47     System.out.println("Student Name: " + student.name);
48     System.out.println("Average Grade: " + student.calculateAverage());
49     System.out.println("Letter Grade: " + student.calculateLetterGrade());
50 }
51 }
```

OUTPUT

Student Name: Akileshwaran

Average Grade: 84.5

Letter Grade: B
